About IFVP

The International Forum of Visual Practitioners (IFVP) is a global network of practitioners who use visual methods to assist learning and communication between groups and individuals. We are bound together by our strong belief in the power of visuals and visual thinking… knowing innately that a picture is truly worth more than a thousand words, we come together to share our experiences, trade resources, explore new tools, encourage each other, and year by year, raise the profile of our unique and growing profession. *Find out more about us at http://www.IFVP.org*
